

Head to Head Movement

Deriving word orders that X-bar theory can't account for.

Learning Objectives

- Understand the distinction between D-structure and S-structure.
- Determine whether a language is verb-raising or not.
- Discuss the interaction between $V \rightarrow T$ and $T \rightarrow C$.
- Explain the evidence for $V \rightarrow T$ movement in French and Irish.
- Discuss the position of tensed English auxiliaries as compared to main verbs.
- Explain how the VP-internal subject hypothesis accounts for VSO languages.
- Discuss the whens, wheres, and whys of do-support.

A Problem with X-bar

- X-bar theory requires that nothing may intervene between a head and its complement (by definition).
- Direct objects are the complements of verbs

A Problem for X-bar

- 9% of the world's languages exhibit VSO order

V S O

Phóg Máire an Iucharachán

Kissed Mary the leprechaun

“Mary kissed the leprechaun”

- The subject (a specifier) intervenes between the V and its complement.
- You can't draw a tree like this! Try it!

A new kind of rule

- **Movement Rule:** A rule that moves something around in the sentence
 - Subject/Aux Inversion
- We'll use movement rules to account for word order paradoxes like VSO order.
- The first movement rule we'll look at is head-to-head movement. (Moving a head into a head).

French Adverbs

French Adverbs

- Adverbs are adjuncts

French Adverbs

- Adverbs are adjuncts
- But adverbs in French appear between the verbal head and the object (complement)

French Adverbs

- Adverbs are adjuncts
- But adverbs in French appear between the verbal head and the object (complement)
- Je **mange** **souvent** des pommes **V** **adv** **Obj**
I eat often the apples
“I often eat apples”

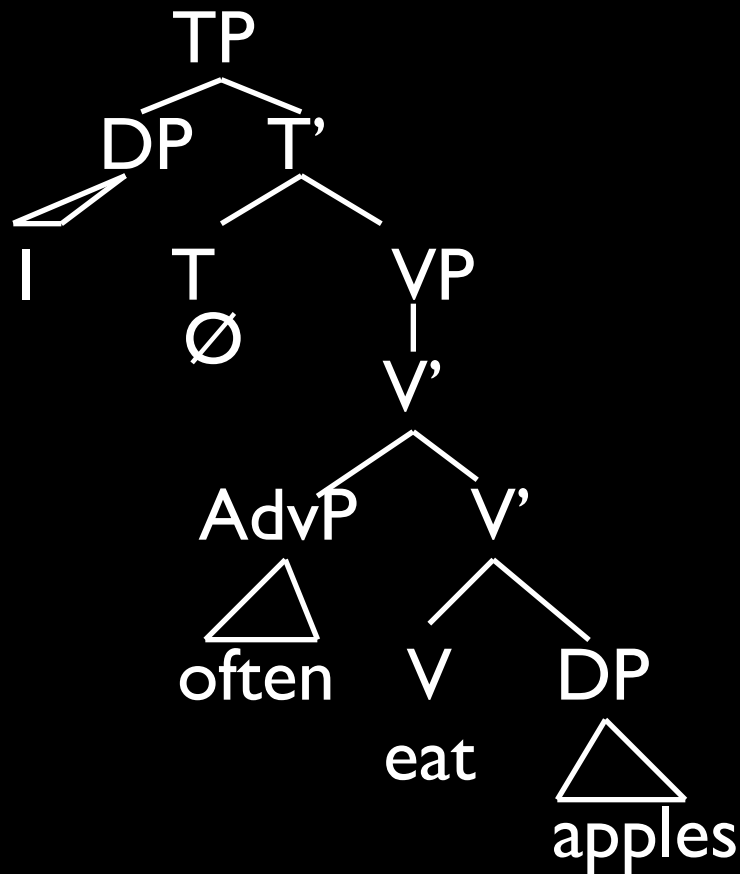

French Adverbs

- Adverbs are adjuncts
- But adverbs in French appear between the verbal head and the object (complement)

- Je **mange** **souvent** des pommes **V** **adv** **Obj**
I eat often the apples
“I often eat apples”

- *Compare:* I **often** **eat** apples **adv** **V** **Obj**

English Adverbs

If the verb appears before the adverb in French, where does it attach?

French vs. English Adverbs

- a) Je **mange** **souvent** des pommes
I eat often apples
Verb appears here when no overt auxiliary
- b) I **often** **eat** apples
- c) J' ai **souvent** **mangé** des pommes
I have often eaten apples
auxiliary
- b) I have **often** **eaten** apples

French vs. English Adverbs

a) Je	mange	souvent	des pommes	<i>Verb appears here when no overt auxiliary</i>
I	eat	often	apples	
b) I		often	eat apples	
c) J'	ai	souvent	mangé des pommes	
I	have	often	eaten apples	
b) I	have	often	eaten apples	

T

French vs. English Adverbs

- a) Je **mange** **souvent** des pommes
I eat often apples
Verb appears here when no overt auxiliary
- b) I **often** **eat** apples
Verb appears here when T is filled
- c) J'

ai
have

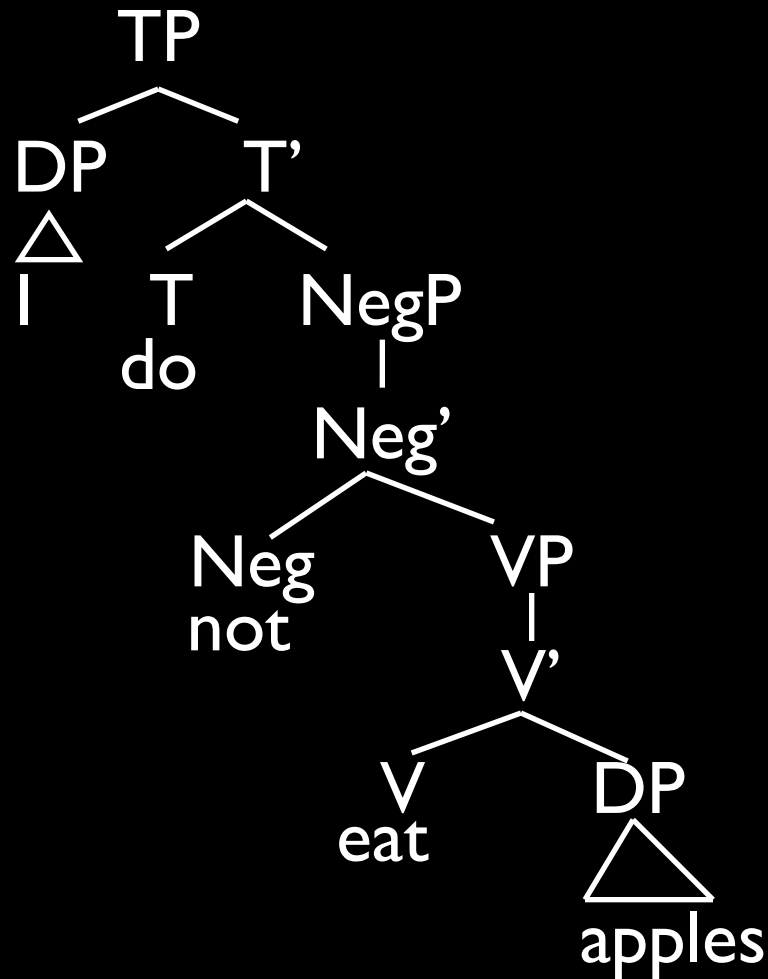

souvent **mangé** des pommes
I have often eaten apples
- b) I **have** **eaten** apples
verb appears here when T is filled

French vs. English Adverbs

- a) Je **mange** **souvent** des pommes
 I eat often apples
Verb appears here when no overt auxiliary
- b) I **often** **eat** apples
Verb appears here when no overt auxiliary
- c) J' ai **souvent** **mangé** des pommes
 I have often eaten apples
verb appears here when T is filled
- b) I have **often** **eaten** apples
 T

conclusion: tensed V in French is in T

English Negation

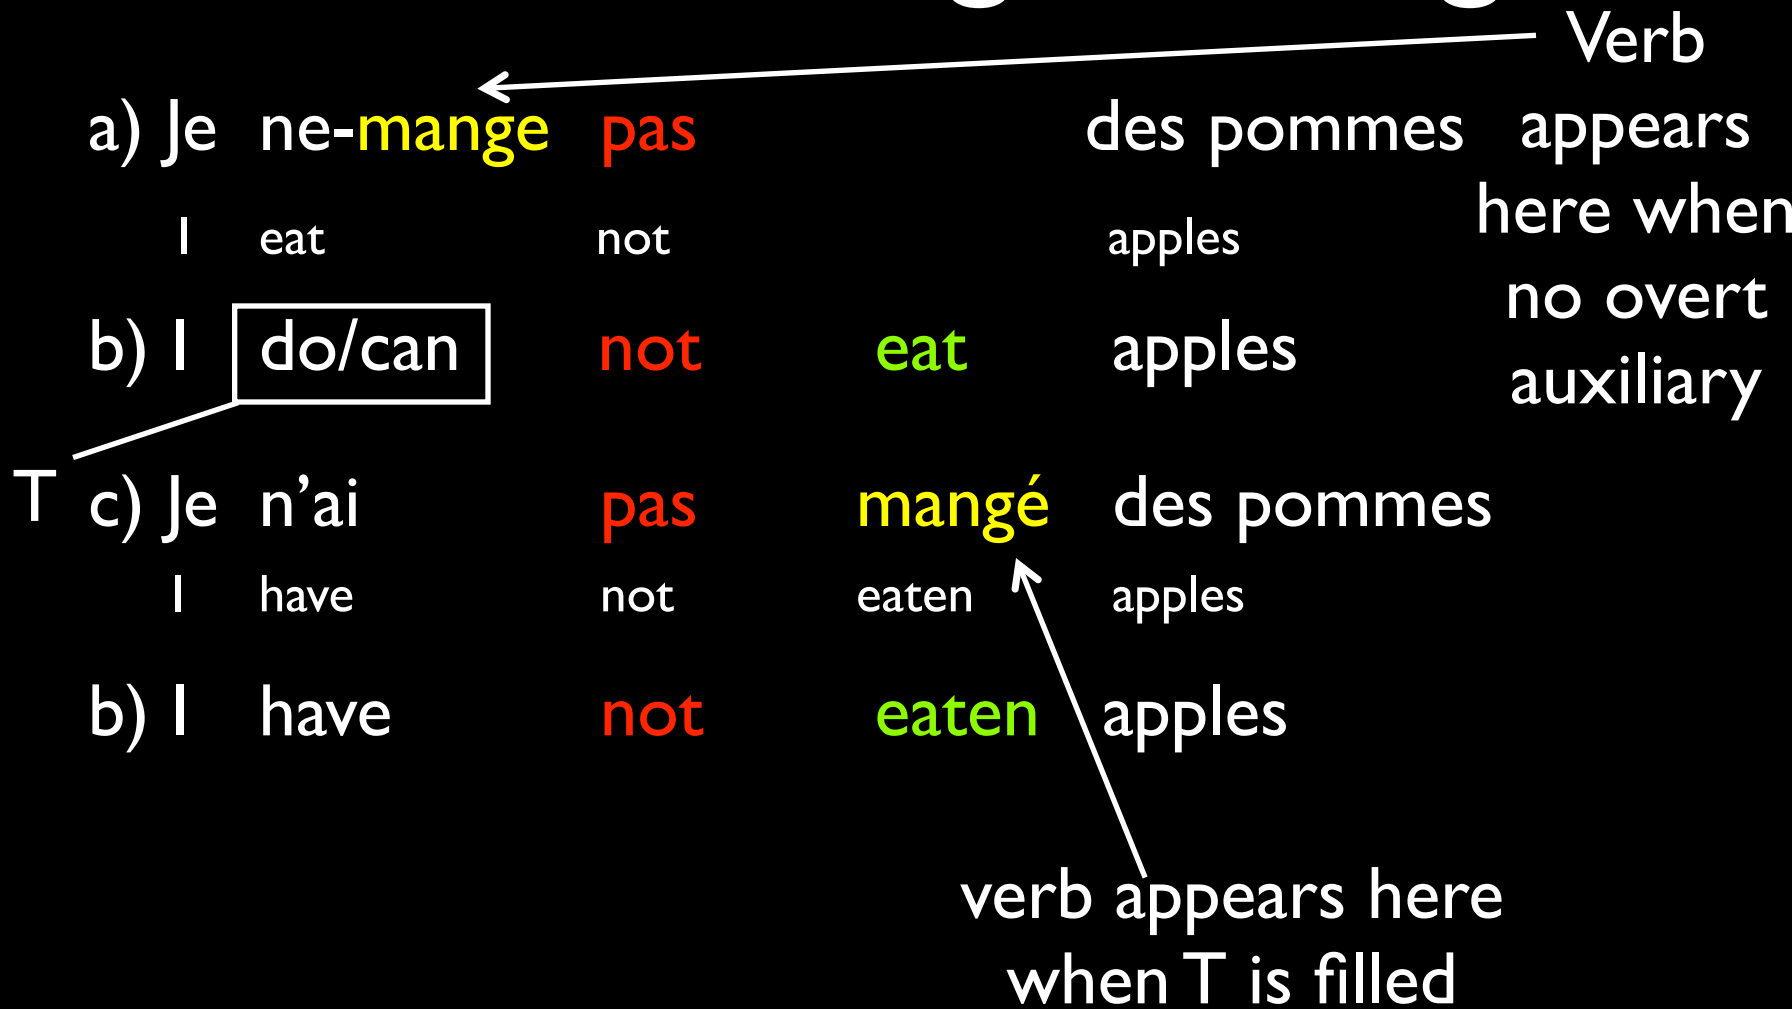

Some Auxs are in Tense

- I may not eat apples
- *I not may eat apples
- *I do not may eat apples
- I have not eaten apples
- *I not have eaten apples
- *I do not have eaten apples
- Tensed Auxiliaries appear in the same position as Modals in English relative to negation

French vs. English Neg

					Verb
	a) Je	ne-mange	pas	des pommes	appears
	I	eat	not	apples	here when
	b) I	do/can	not	eat	apples
					no overt auxiliary
T	c) Je	n'ai	pas	mangé	des pommes
	I	have	not	eaten	apples
	b) I	have	not	eaten	apples

French vs. English Neg

French vs. English Neg

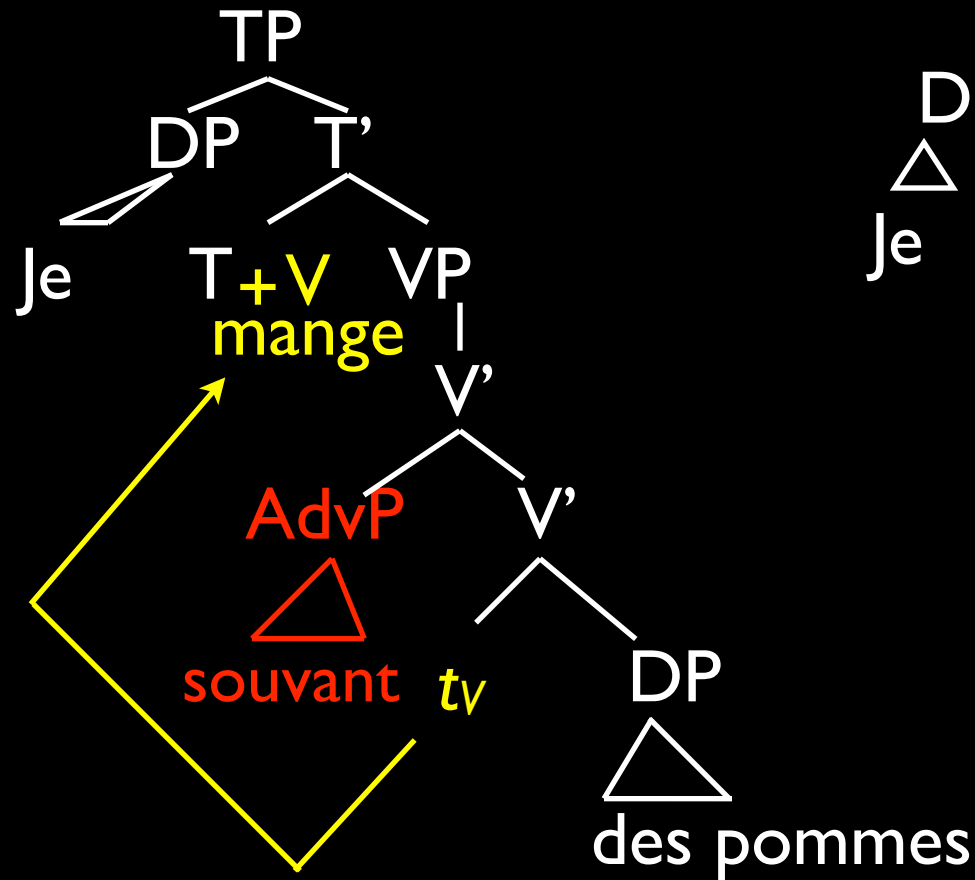

conclusion: tensed verbs in French and English Auxs are in T

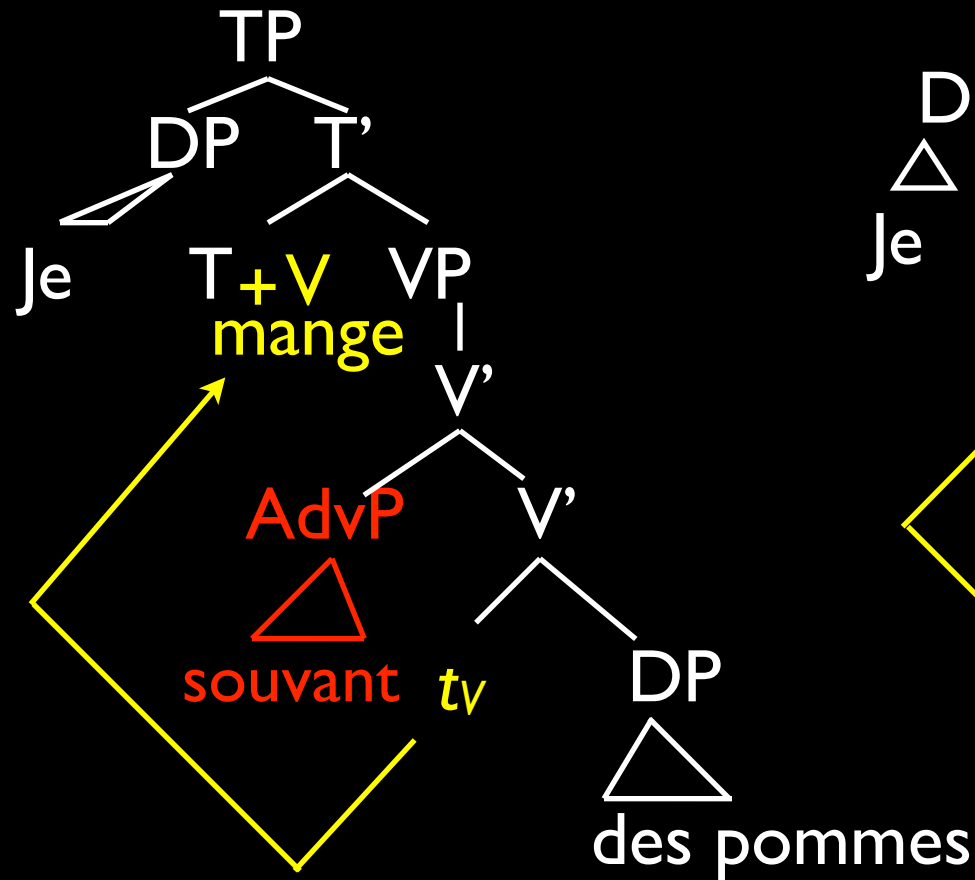

Verb Raising $V \rightarrow T$

Verb Raising $V \rightarrow T$

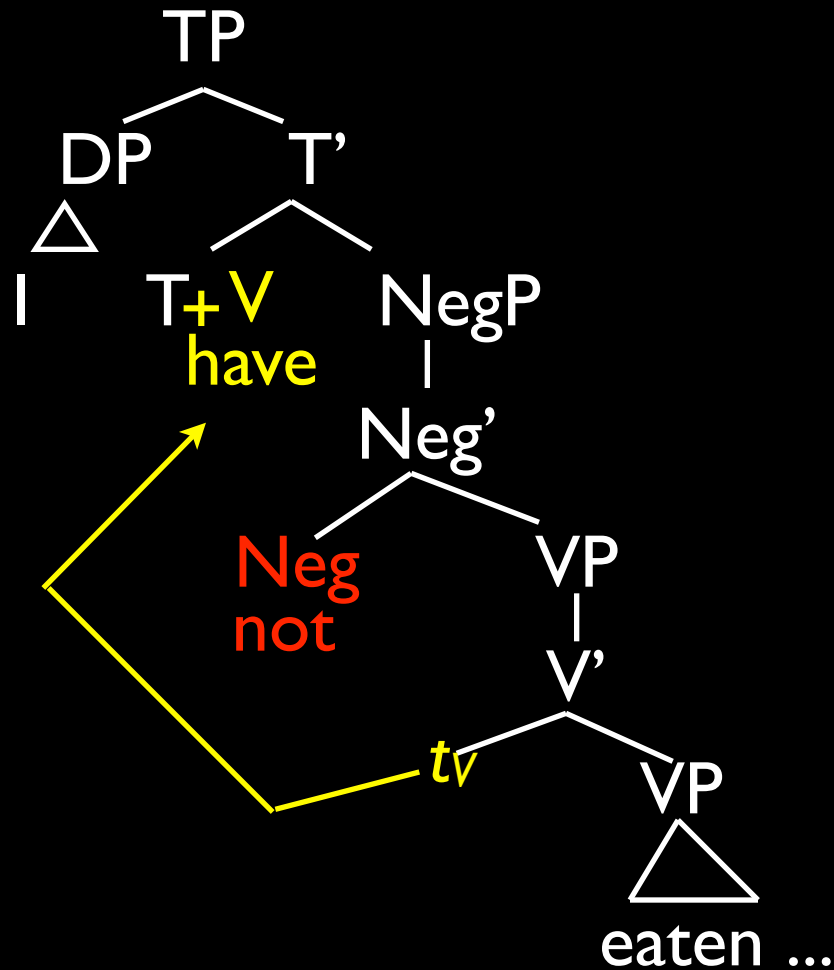

Verb Raising $V \rightarrow T$

Verb Raising $V \rightarrow T$

Verb Raising $V \rightarrow T$

The Verb Movement Parameter

- The verb raising parameter:
 - All verbs raise to T (French) OR only auxiliaries raise to T (English)

Verb Raising in Vata

a) a la saka li
we have rice eaten
“We have eaten rice”

b) a li saka tv
we eat rice
“We eat rice”

Data from Koopman
1984

Verb Raising in Vata

a) a la saka li
we have rice eaten
“We have eaten rice”

b) a li saka tv
we eat rice
“We eat rice”

Data from Koopman
1984

Verb Subject Object Order

1) Tá **Máire** ag-pógáil an lucharachán
Is Mary ing kiss the leprechaun
“Mary is kissing the leprechaun”

2) Phóg **Máire** an lucharachán
kissed Mary the leprechaun
“Mary kissed the leprechaun”

Tensed verbs and Auxiliaries in Irish show
positional alternations just like Vata and
French.

Verb Subject Object Order

- 1) Tá **Máire** ag-pógáil an lucharachán
Is Mary ing kiss the leprechaun
“Mary is kissing the leprechaun”
- 2) Phóg **Máire** an lucharachán
kissed Mary the leprechaun
“Mary kissed the leprechaun”

Tensed verbs and Auxiliaries in Irish show
positional alternations just like Vata and
French.

Problem: How do you get the subject after T?

- VP internal Subject hypothesis: Subjects are generated in the specifier of an active voice VP

Problem: How do you get the subject after T?

- VP internal Subject hypothesis: Subjects are generated in the specifier of an active voice VP

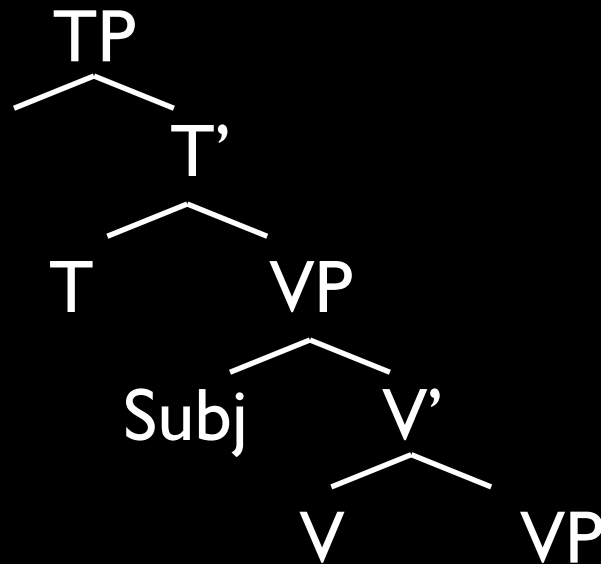

Problem: How do you get the subject after T?

- VP internal Subject hypothesis: Subjects are generated in the specifier of an active voice VP

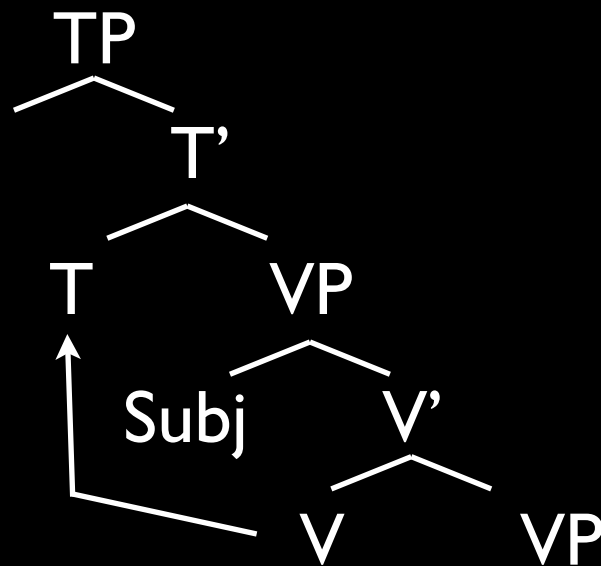

Problem: How do you get the subject before T in French??

- Subjects in French and English (but NOT Irish) raise from spec VP to spec TP (*the reasons will be discussed in the next unit*)

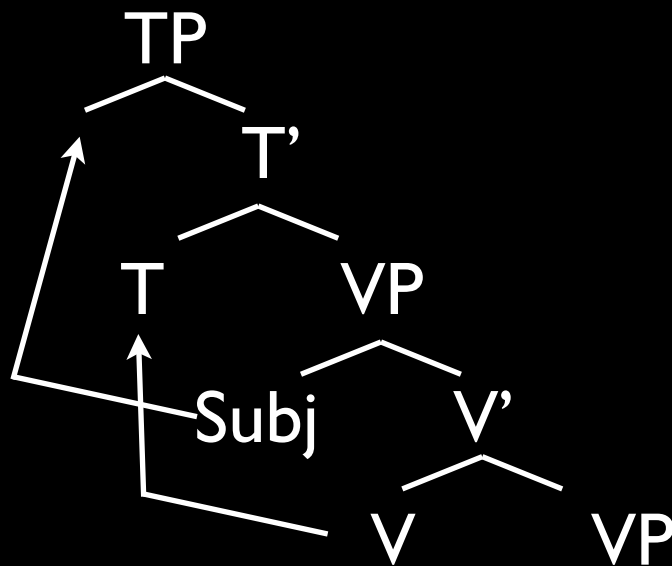

Problem: How do you get the subject before T in French??

- Subjects in French and English (but NOT Irish) raise from spec VP to spec TP (*the reasons will be discussed in the next unit*)

Problem: How do you get the subject before T in French??

- Subjects in French and English (but NOT Irish) raise from spec VP to spec TP (*the reasons will be discussed in the next unit*)

Problem: How do you get the subject before T in French??

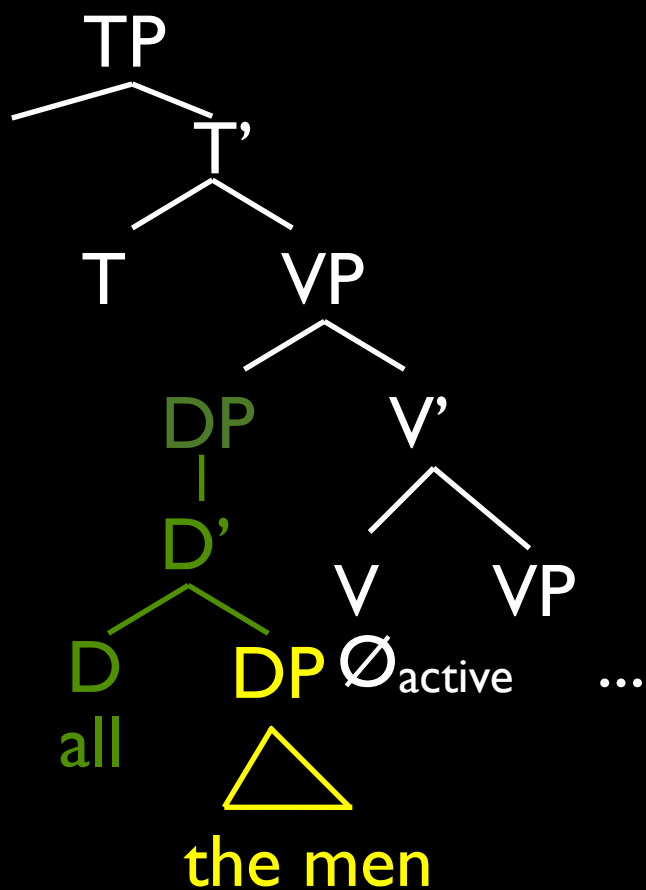

- Subjects in French and English (but NOT Irish) raise from spec VP to spec TP (*the reasons will be discussed in the next unit*)

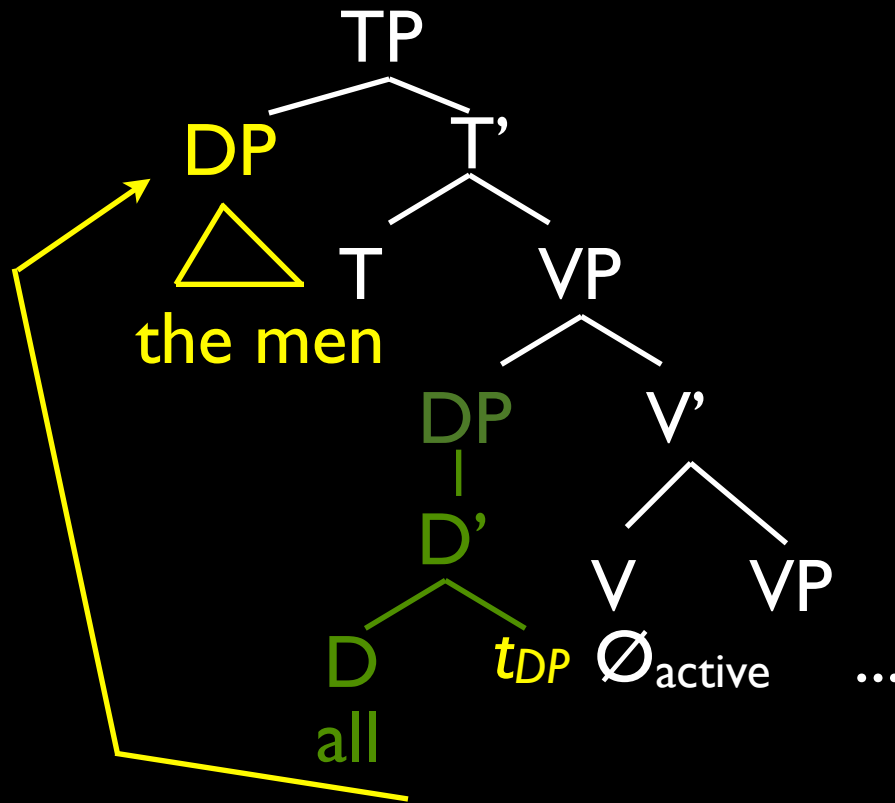

Is there evidence for VP internal subjects in English?

- What does *all* modify in the following sentence?
 - The men have **all** eaten already
- If the principle of modification holds true then *all* had to be part of a constituent [all the men] at some point.

Is there evidence for VP internal subjects in English?

Is there evidence for VP internal subjects in English?

Summary of V to T

Summary of V to T

- X-bar theory can't generate V adv O order or VSO order

Summary of V to T

- X-bar theory can't generate V adv O order or VSO order
- Observation: These orders don't show overt auxiliaries

Summary of V to T

- X-bar theory can't generate V adv O order or VSO order
- Observation: These orders don't show overt auxiliaries
- Verb raises to T around negation, adverbs, and VP internal subjects.

Summary of V to T

- X-bar theory can't generate V adv O order or VSO order
- Observation: These orders don't show overt auxiliaries
- Verb raises to T around negation, adverbs, and VP internal subjects.
- Verb movement is motivated by inflectional suffixes.

Summary of V to T

- X-bar theory can't generate V adv O order or VSO order
- Observation: These orders don't show overt auxiliaries
- Verb raises to T around negation, adverbs, and VP internal subjects.
- Verb movement is motivated by inflectional suffixes.
- English doesn't show verb movement: Verb Raising parameter.

Summary of V to T

- X-bar theory can't generate V adv O order or VSO order
- Observation: These orders don't show overt auxiliaries
- Verb raises to T around negation, adverbs, and VP internal subjects.
- Verb movement is motivated by inflectional suffixes.
- English doesn't show verb movement: Verb Raising parameter.
- Subjects in all languages start in spec of a voice-headed VP

Another instance of head movement: $T \rightarrow C$

Subject Aux Inversion:

You have squeezed the Charmin[©]

Have you squeezed the Charmin[©]?

Complementizer question particles in Irish

An bhfaca tú an madra

Q See you the dog

“did you see the dog”

T to C movement

T to C movement

T to C

- Evidence: subject/aux inversion not allowed with an embedded Q complementizer
 - I asked have you squeezed the Charmin
 - I asked whether you have squeezed the Charmin
 - *I asked whether have you squeezed the Charmin.

Interaction between V to T and T to C

- In French, both main verbs and auxiliaries are in T. Prediction: both main verbs and auxiliaries will undergo T to C:

Avez-vous Mangé des pommes?
have-you eaten the apples

Mangez vous des pommes?
Eat you the apples

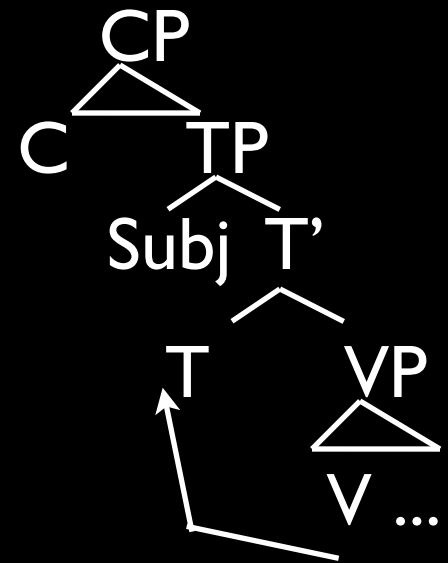

Interaction between V to T and T to C

- In French, both main verbs and auxiliaries are in T. Prediction: both main verbs and auxiliaries will undergo T to C:

Avez-vous Mangé des pommes?
have-you eaten the apples

Mangez vous des pommes?
Eat you the apples

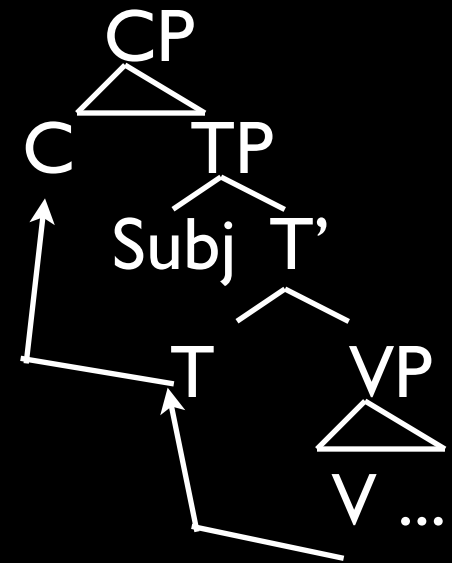

Interaction between V to T and T to C

- In French, both main verbs and auxiliaries are in T. Prediction: both main verbs and auxiliaries will undergo T to C:

Avez-vous Mangé des pommes?
have-you eaten the apples

Mangez vous des pommes?
Eat you the apples

Interaction between V to T and T to C

- In English, only tensed auxiliaries are in T.
Prediction: only auxiliaries will undergo T to C:

Have you eaten the apples?

*Eat you the apples?

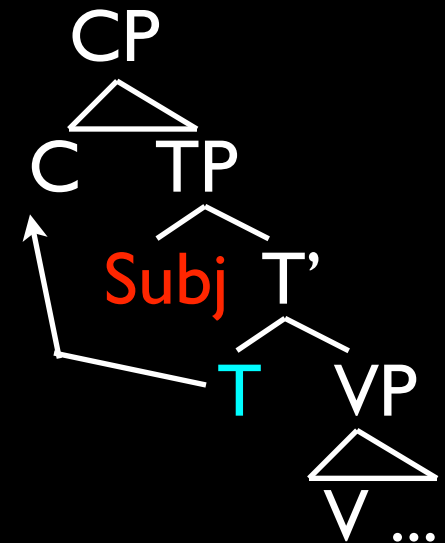

Interaction between V to T and T to C

- In English, only tensed auxiliaries are in T.
Prediction: only auxiliaries will undergo T to C:

Have you eaten the apples?

*Eat you the apples?

$N \rightarrow D?$

- Are there other kinds of head movement?
Such as $N \rightarrow D$? Try the problem sets in the back of the chapter to find out!

Summary

- Word Orders not produced by X-bar (VSO, V adv O, V Neg O) are generated by head to head movement.
- V to T: motivated by the need for T to be pronounced
- V to T alternates with Affix lowering (parameter)
- VSO order results from a conspiracy of V to T and VP internal subjects

Summary

- Subject Aux Inversion involves T to C movement.
- T to C movement motivated by need to pronounce [+Q] Complementizer
 - (evidence: overt complementizers block T to C)
- T to C and V to T interact.
- Do support triggered when T can't be supported any other way.
